

Team Responsibility Breakdown

The project development was divided into 3 core modules, with each member responsible for the full lifecycle (Backend, Frontend, and Testing) of their respective entity.

Member Name	IT Number	Responsible Module	Deliverables
Paranahewa K.P	IT24103814	Auth, Security & Maintenance, Room & Booking Management	JWT Login/Register, Profile Management, Maintenance Request System, Priority Logic, Room CRUD, Image Uploads, Occupancy Logic, Room Booking & Approval Workflow.
Jayawardena T.N.D.J	IT24102470	Visitor Tracking	Visitor Logs, Digital Registration.
Madushanka I.I.T	IT24103692	Financials	Fee Payment Tracking, Receipt Uploads.

Shared Responsibilities:

- **Database Design:** Collaborative schema definition using MongoDB Atlas.
- **UI/UX Design:** Standardized "Dark Premium" theme applied across all modules.
- **Documentation:** Group effort in preparing the Problem Statement and System Architecture.
- **Testing:** Components testing via Expo Go.
